

Hi Support

Use of table from the pagebuilder addon list seems to have a problem

The default values can not be edit or replased by new values. If all Table Head Items and defalt row is deleted and replace by new values nothing is shown in the front end

Question Is this issue alredy reported and will this be soled in a hot fix soon

Please see below where I have added a table to a new page

When editing the table you will see the below menu

Addon: Table

GENERAL

STYLE

ADVANCED

Admin Label

Define an admin label for easy identification.

Table Settings

Table Contents

Table Styles

TABLE HEADING OPTIONS

Turn Off Header

☐ NO

Select 'Yes' if you want to turn off header.

Table Head Items(<th>)

+ Add Item

↑ ↓ Item 1	  
↑ ↓ Item 2	  
↑ ↓ Item 3	  
↑ ↓ Item 4	  

TABLE ROW OPTIONS

Table Row Items(<tr>)

+ Add Item

When I save the new table page and do a preview on the front end I see the below page

First Name	Last Name	Countries	Capitals
Ronald	Curiel	USA	Washington, D.C.
Roger	Morison	Sweden	Stockholm
Luca	Jane	Russia	Moscow
Marry	Chan	China	Beijing

If I go back and edit the default values like below

• TABLE HEADING OPTIONS

Turn Off Header

☐ NO

Select 'Yes' if you want to turn off header.

Item 1	<button>Apply</button>
--------	------------------------

Admin Label

Define an admin label for easy identification.

Column Span Number

Use column span to expand the number of cells for that column. If you use column span to the first item, it will take over the data of the second item thus it is advised to add an additional column at the end to avoid empty space.

Column Header Content

 Text Block

Add Addon

• TABLE ROW OPTIONS

Table Row Items(<tr>)

+ Add Item

 Item 1	  
--	---

New values or added values is not will not be shown in the front end

I hope this explain the issues?
